

First Start

After installation, make sure your computer runs through restart prior to first start.

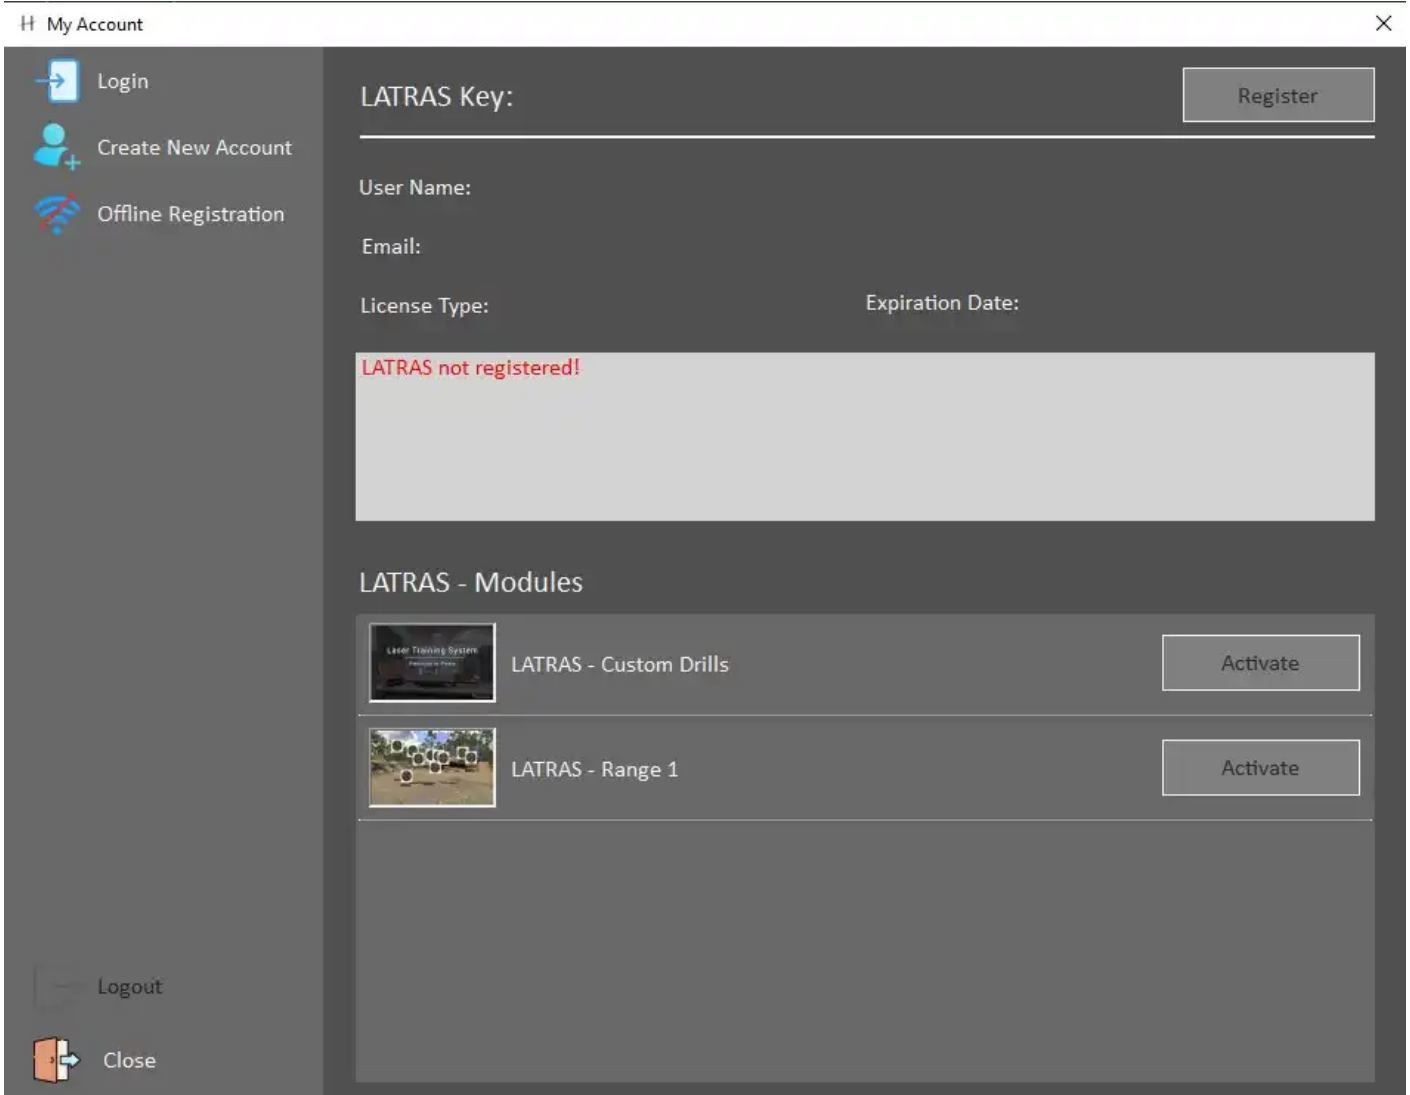

First Start

Double click on the **Latras.exe** file.

Once loaded, message about missing licence appears. Click Close and then go to folder [My account](#) which is located in the upper left corner of the application.

Click close and continue to My account (located in the upper left corner of the screen).

Available options are:

Login - to be used for existing Helion Interactive account.

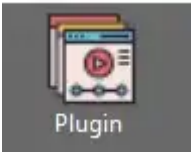

Create New Account - in case no account has been set up yet. Required information is UserName, email, and a password.

After filling in the information, proceed with Create Account button. An automated verification email with a unique code will be sent to your email address. Enter the code and click Verify.

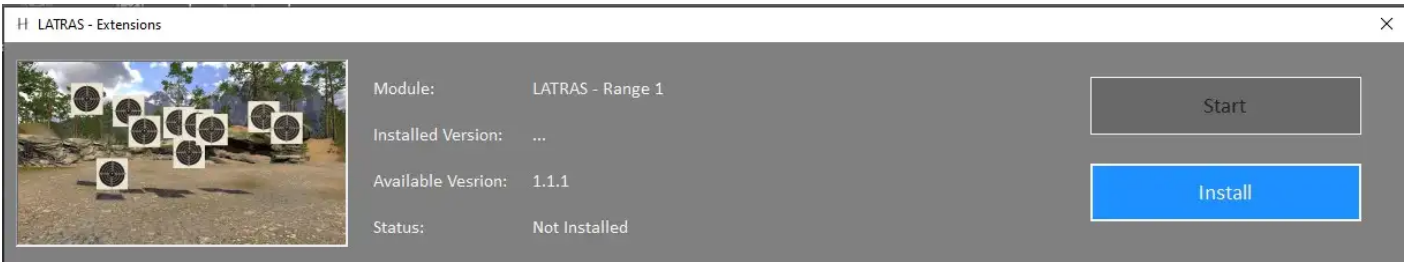

In case you haven't received the email within a few minutes, try Send New Code button. If the code doesn't come, or troubles with the verification persist, email to info@helioninteractive for help.

After successful verification, leave the My account window to see the main page Latras Hub. It is now possible to download the Range 1 plug-in.

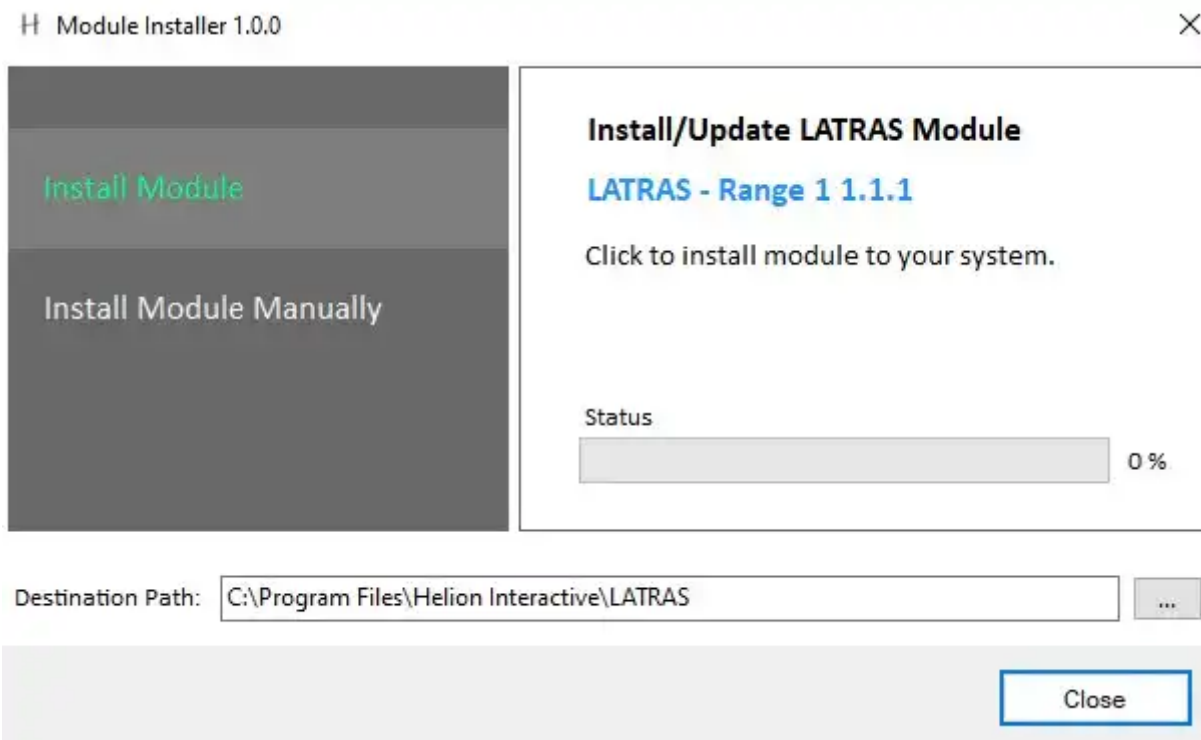

Click the **Plug-in** button.

In the newly opened dialog, click Install.

Then select **Install Module**. It will automatically download and install the latest version of Range 1.

Install Module Manually is suited for locating an existing installation or troubleshooting.

After its installation, Range 1 is available in Demo mode. For full use, the licence must be activated in My Account folder.

For full activation of the Range 1 module, go to the main page and select [My Account](#).

Licence Activation

Select **Acivate**, enter your Product Key and [Verify](#) it.

If sucessfully verified, Range 1 can be switched from Demo to full active mode by the [Activate](#) button.

Last step is to restart LATRAS.
